

Posting on craigslist.org (CL)

* Post 10 ads on craigslist.org daily.

Day 1 - Post 20 different ads to 20 cities and no more.

Day 2 - Post 20 different ads to 20 cities and no more.

Day 3 - Post 20 different ads to 20 cities and no more.

Day 4 and on - Repeat the above sequence

The keys to successful posting on CL are (i.e. not getting your ads flagged/deleted):

- Do not create accounts or login to post ads. Use the non-registered user method.
- Each ad must be unique i.e... ten different ads for day 1 (different title and ad bodies), ten different for day 2 and so on...
- You can repost the same ad(s) every 48 hours (hence the 3 day sequence)
- Only post in Services > Small Biz Ads
- You can use the same URL but put it in the middle of the ad body (i.e. not the end)

- Use a different email address for each ad. Do not login under an account. (20 Gmail accounts is fine)
- Each day, you will need twenty new headlines and ad bodies. (60 ads total) - Write them in your word processor before you are ready to post.
- Posting more than 20 per day is risky and likely to get you banned.
- You can also use invisible text - put invisible **RANDOM** text as the **last line of each post**. Each random line must be different.
- Here is the code:

Managing the emails, you will get when you post.

- Take the Gmail accounts you setup and forward them to a main catch-all email account (under forwarding settings in Gmail).
- When you post, just go to the main catch-all account you setup and all the emails will be in one place.
- Then click the post/confirm links.

Go to Craigslist.org choose a State, then a City, from there go to post to classifieds at top left of page, from there go to service offered and then small biz ads

Put in a headline, and then the body message, then put in an email address (create a new email address for every two or three ads; go through Google,

yahoo, msn, or hotmail etc)
Then do an anonymous contact

You Don't Need To Do An Email Contact Because You Will Be Directing Prospects To Your Website in Your Ad. However, you can do email contact if you like then when the prospect send you an email, just send them your website link to get more information.

use this email address as my reply-to
reply to: serv-xxxxxxxx@craigslist.org (craigslist anonymizes your real address and relays replies to it)
do not show any email address (**be sure to put a phone # or other contact info in your posting!**) for

Repeat to as many Cities as you have time for (once you get it down it should take about a minute per City)
